Art Unit: 1644

DETAILED ACTION

- 1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/30/07 has been entered.
- 2. Claims 16-21, 23-29, 31-33, 37-42, 46-65, and 68-78 are pending.
- 3. Claim 31 stands withdrawn from further consideration by the examiner, 37 C.F.R. 1.142(b) as being drawn to a non-elected invention.
- 4. In view of the amendment filed 5/30/07, the following rejection remains.
- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.
- 6. Claims 16-21, 23-29, 32, 37-41, 46-65, and 68-70 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The "wherein said chimeric CH2 domain is at least 98% identical to a CH2 sequence (residues 231-340) from human IgG1 or IgG4 having said modified amino acids" in claim 21 (beginning at page 4 of the amendment to the claims) is indefinite because after substituting the blocks of amino acid at 233P, 234V, 235A, 236G, 327G, 330S and 331S in human IgG1 CH2 domain, the sequence identity is at least 95% (6 substitutions in the full CH2 sequence, which is 110 amino acids in length) rather than the recited 98%. Likewise, substituting the blocks of amino acid at 233P, 234V, 235A, 236G, 327G, 330S and 331S in human IgG2 or IgG4 CH2 domain, the sequence identity is at least 98% (3 substitutions in the full CH2 sequence, which is 110 amino acids in length). One of ordinary skill in the art cannot appraise the metes and bound of the claimed invention. The same reasoning applies to claims 32, 41, 55 and 66. The remaining claims are rejected for depending from said indefinite claims 21, 32, 41, and 55.

Application/Control Number: 09/674,857

Art Unit: 1644

Applicants' arguments filed 5/30/07 have been fully considered but are not found persuasive.

Applicants' position is that since the claims only cover sequences that have the required blocks of amino acids, i.e., 233P, 234V, 235A, 236G and 327G, 330S and 331S, the 98% identity language, in effect, allows a further 2 changes within the (defined, modified) 110 amino acid Ca2 sequence. This represents a reasonable balance between Applicants' contributions and the scope of protection sought.

In response, it appears that applicants argue scope rejection, but the examiner's rejection is based on infinite language under 35 U.S.C. 112, second paragraph. This rejection is maintained because after substituting the blocks of amino acid at 233P, 234V, 235A, 236G, 327G, 330S and 331S in human IgG1 CH2 domain, the sequence identity is at least 95% identity in reference to human IgG1 CH2 domain (6 substitutions in the full CH2 sequence, which is 110 amino acids in length). Likewise, substituting the blocks of amino acid at 233P, 234V, 235A, 236G, 327G, 330S and 331S in human IgG2 or IgG4 CH2 domain, the sequence identity is at least 98% identity with respect to human IgG2 or human IgG4 CH2 domain (3 substitutions in the full CH2 sequence, which is 110 amino acids in length).

- 7. Claims 33 and 42 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 8. Claims 71-78 are allowed.
- 9. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 1644

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

- 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuong Huynh, Ph.D. whose telephone number is (571) 272-0846. The examiner can normally be reached Monday through Friday from 9:00 am to 5:30 p.m. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (571) 272-0841. The IFW official Fax number is (571) 273-8300.
- Any information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
